

## Greetings from Institute Of Nursing Sciences

Malwanchal University is the one of the best university for all types of medical and Non- medical courses. It is situated in Indore, Madhya Pradesh..

Institute Of Nursing Sciences is working for imparting dynamic education to the students for rendering Quality Nursing Care in clinical area. The institute offers diploma, degree and masters programs in Nursing under the affiliation of Indian Nursing Council, M.P Nurses Registration Council, DAVV and Malwanchal University.

### Overview Of Topic

Preterm is defined as babies born alive before 37 completed weeks of gestation. Most preterm births happen spontaneously, but some are due to early induction of labour or caesarean birth, whether for medical or non-medical reasons.

*THEME for the workshop is :*

***"Born too soon: Intact Survival of the Pre term"***

Preterm births, is the most pivotal reasons for the neonatal deaths. Better understanding of the causes and mechanisms will advance the development of solutions to prevent preterm birth. According to WHO (2016)

- Every year, an estimated 15 million babies are born preterm (before 37 completed weeks of gestation), and this number is rising.
- Preterm birth complications are the leading cause of death among children under 5 years of age, responsible for nearly 1 million deaths in 2015.
- Three-quarters of them could be saved with current, cost-effective interventions.

In low-income settings, half of the babies born at or below 32 weeks (2 months early) die due to a lack of feasible, cost-effective care, such as warmth, breastfeeding support, and basic care for infections and breathing difficulties.

### Objectives Of Workshop

The objective is to deliver knowledge regarding pre terms care to the student nurses along with making them acquaint with skills in caring pre term babies.

## PROGRAMME SCHEDULE

### SESSION 1

Time	Topic	Resource Person
