1-INTRODUCTION:-

Sustainable development is not possible without the protection of the environment and natural resources and their responsible and fair use. Inadequate control of water, air and soil pollution, waste problem, soil erosion has serious economic health and social consequences. Environmental policy provides answers to negative impacts of human activities on environment and natural resources.

2-PURPOSE:-

This policy will play an integral role to develop an environmentally sustainable and economically viable campus that reflects the university's core values of engagement and accountability. The policy statement represents a commitment to meet the needs of students, faculty and staff while preserving the environment for future generations

The University is committed to preparing its students to become engaged in environmental protection activities.

3-SCOPE:-

The policy applies to all constituent units of Malwanchal University including students, faculty, staff and visitors.

4-POLICY STATEMENT:-

The Malwanchal University takes a great pride in the natural beauty of its lush green campus. The university recognizes that all of its academic and associated activities have impact on the environment of local, national and global level

The university is fully committed to minimizing these impacts as far it is practicable and seeks the support of all its students, staff and other stakeholder to contribute to achieving environment excellence.

1. Field of focus is:-
2. Recycling programs
3. Composting
4. Efficient lightning
5. Green campus initiation
6. Reduce paper and plastic use
7. Reduce carbon emission

5-PROCEDURE:-

The Malwanchal University commits to develop environmental strategies which will:-

- Promote education for sustainable development through value added courses.
- Maintain an environmental management system
- Increase environmental awareness' of students, staff and visitors to the university
- Protect the environmental including prevention of pollution and continual improvement of environmental management system
- Use water more efficiently and reduce the volumes of water used in campus
- Encourage the use of sustainable forms of transport by students and staff
- Increase the biodiversity of the university campus and surrounding areas
- Minimize nuisance to local communities and neighbors
- Use natural resources efficiently and responsibly.
- The university will strive to practice ecological responsibility focused on the preservation of its gardens.
- The university will promote the use of environmentally conscious transportation to all members including common vehicles and car pooling
- The university will partner with other educational institutional agencies to improve best practices in its operations.
- The university will provide water recycling station and item specific collection centre
- The university will purchase energy star rated appliances and computers, paper products and cleaning products from certified vendors
- An Environmental Committee constituted by the university comprises of appointed faculty members staff and students from across the campus to address environmental sustainability issues.
